

Open Letter to the Public

During the last few weeks, through the medium of the press, we have laid before you crisp, forcible and accurate information regarding the status of our company with the object of proving to you the advantages and safety of Class "G" stock as a 10 per cent investment.

Before we placed Class "G" stock on the market we prepared the way for its investment and productiveness, so that we are not seeking to increase our capital on a supposition or a possibility, but FOR A DETERMINED OBJECT—the development of the "Manuel Romero Rubio" Colony. Class "G" stock will not only participate in the profits to be derived from the latter operation, but also in those to be received from our business as it stands today, which has taken TEN YEARS to build up and which represents a capital of OVER A MILLION DOLLARS.

We invite your attention to our notice on page 24 and would ask you to carefully study that and all the other information we have given you. A thoughtful perusal of these facts will convince you that you should take as much as you can of Class "G" stock at once.

Has any other company seeking subscriptions to its stock made plainer its standing than we have done?

Is there any other investment on the market today which you can get AT PAR which offers a TEN PER CENT return and CAN BE REDEEMED at face value?

Our stocks are unique, and are much sought after.

Information regarding this stock and our future operations will be given on application to our central office.

COLONIA ROMA.

The many attractions of this handsome quarter are gradually becoming more and more appreciated, thus explaining why the Colony grows in public favor continually.

FIVE MILLION DOLLARS

Already invested in beautiful residences and City improvements—and the building still goes on.

The tracks of the electric tramway company are now being laid, thus adding another feature to this aristocratic quarter.

Lots can still be secured at reasonable prices and easy terms.
